ADIDAS SPORT EYEWEAR: PERFORMING VISION

adidas Sport Eyewear frames are designed to optimize sports performance. The new SP0088 and SP0089 styles offer an additional prescription lens to fit inside the frame to ensure perfect vision to people who need prescription eyewear to practice their activities.

The extreme technical quality of the frames and the details studied to ensure the best ventilation and maximum grip are further enhanced by the possibility of combining the styles with a practical and comfortable optical lens calibrated to the diopters of each athlete.

A clip-in mechanism lets you safely attach this separate optical lens to the nose pad in a quick and easy way without altering the performance of the sunglasses.

Produced and distributed by Marcolin, the eyewear will be available starting mid-September in selected opticians and on www.adidaseyewear.com

SP0088-SP0089 - Performance

New full-rim Performance style combining design and technology. The straight, slim temples seamlessly insert under the athlete's helmet, even during sports events. Temple tips have a rubberized internal surface that increases the grip of the frame for greater stability. The branded nose pad adapts to the face to ensure a perfect fit, while front ventilation holes prevent the lens from fogging during intense sports. The style, conceived with a spheric lens, makes it possible to use a clip-in that is useful for all athletes who need a sports frame that can mount prescription lens inserts.

SP0088 - Eye 150 - Base 6 - Bridge 00 - Temple 125

SP0089 - Eye 144 - Base 6 - Bridge 00 - Temple 125
